Election/Restriction

1. Claims 1-6, 8 and 16-23 directed to semiconductor device are further restricted as follows:

This application contains claims 1-6, 8 and 16-23 directed to the following patentably distinct species of the claimed invention:

1. Embodiment of figure 1
2. Embodiment of figure 3
3. Embodiment of figures 5-6
4. Embodiment of figure 7
5. Embodiment of figure 8
6. Embodiment of figure 10
7. Embodiment of figure 12
8. Embodiment of figure 13

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none is generic.

Applicant is advised that a response to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include

Art Unit: 2811

all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Response to Arguments

Applicant argues that on page 3 of the Official Action, it is stated that applicant must elect a single disclosed species for prosecution, but there has been no assertion as to plural species within any of the identified three groups. Accordingly, applicant believes that this statement on page 3 was made in error.

Inadvertently, the list of the species was not included on page 3 of the restriction requirement of the last office action.
